## Floodway

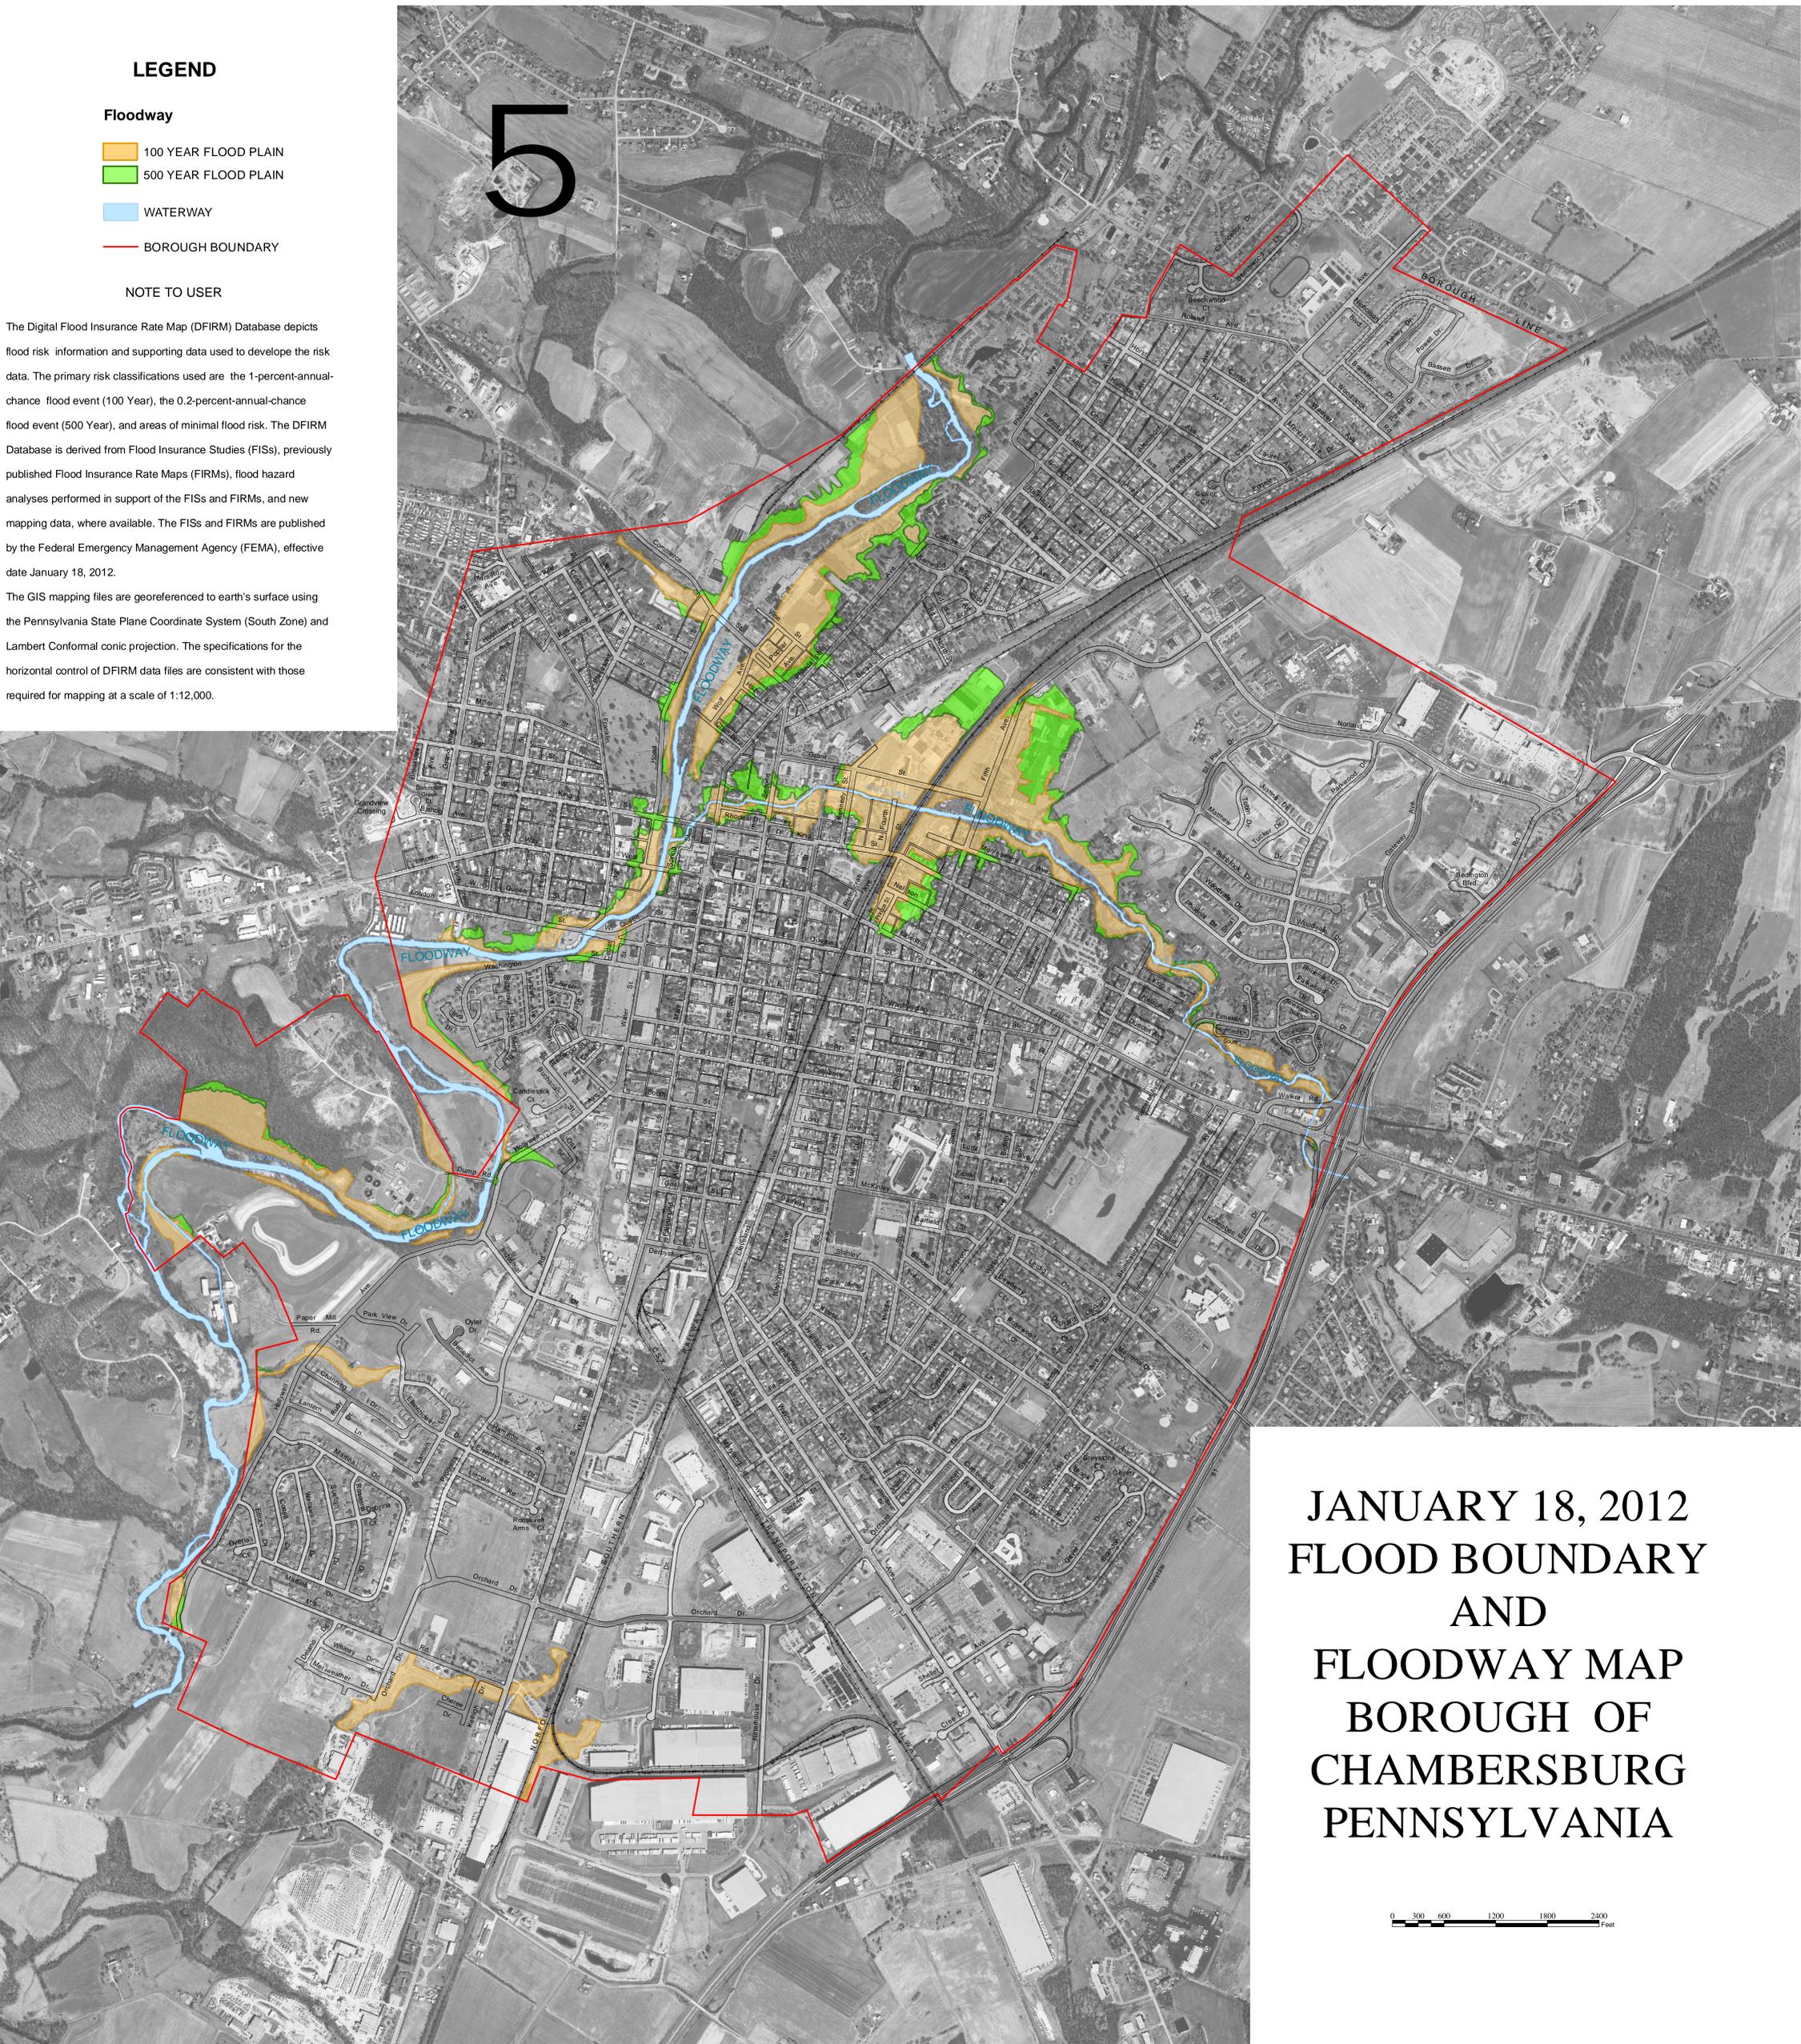

-  100 YEAR FLOOD PLAIN
-  500 YEAR FLOOD PLAIN
-  WATERWAY
-  BOROUGH BOUNDARY

## NOTE TO USER

The Digital Flood Insurance Rate Map (DFIRM) Database depicts flood risk information and supporting data used to develop the risk data. The primary risk classifications used are the 1-percent-annual-chance flood event (100 Year), the 0.2-percent-annual-chance flood event (500 Year), and areas of minimal flood risk. The DFIRM Database is derived from Flood Insurance Studies (FIS), previously published Flood Insurance Rate Maps (FIRMs), flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available. The FISs and FIRMs are published by the Federal Emergency Management Agency (FEMA), effective date January 18, 2012.

The GIS mapping files are georeferenced to earth's surface using the Pennsylvania State Plane Coordinate System (South Zone) and Lambert Conformal conic projection. The specifications for the horizontal control of DFIRM data files are consistent with those required for mapping at a scale of 1:12,000.
